## About This Game

### OVERVIEW

Carmageddon the original classic is back!

Carmageddon is the original freeform driving sensation, where pedestrians (and cows!) equal points, and your opponents are a bunch of crazies in a twisted mix of automotive killing machines. The game features anarchic drive-whenever-you-like gameplay and over-the-top surreal comedy violence. It's the racing game where racing is for wimps.

Now the same Mac & PC classic that was BANNED AROUND THE WORLD is back!

Carmageddon features real-world environments that have been turned into killing fields, where the locals stay out on the streets at their peril. As well as using your car as a weapon, every level is sprinkled generously with power-ups that have a vast variety

---

of mad effects, adding a whole extra level of craziness to the proceedings. In every event you have the option to “play it your way”... Waste all your opponents, kill every pedestrian, or (perish the thought) complete all the laps. Oh and watch out – the cops in their super-tough armoured patrol vehicles are lurking, and if they catch you being bad they’ll be down on you like several tons of cold pork.

## GAMEPLAY

Waste opponents, kill peds and complete laps

The aim is for the player to work their way up the ranking system, from 99th place to first. The player vehicle is pitted against a number of computer controlled competitors, in locations such as cities, mines and desert towns. Levels can be beaten in one of three ways:

- Completing all the laps of the race course, as one would a normal racing game.
- "Wasting" (wrecking) all the opponents vehicles.
- Killing all the pedestrians in the area.

Each level has a time limit, but more time may be gained by passing through checkpoints, collecting powerups, damaging/destroying the competitors' cars, and by running over pedestrians (with bonuses awarded for style).

These actions also reward the player with Credits, which can be used to make instant repairs or recover the car (after falling down a chasm, for example). They can also be used to upgrade Armour, Power and Offense stats in the Parts Shop between races. This is also the time to switch which car to drive if others have been obtained.

As well as opponents partaking in the 'race', some levels also contain a number of heavily armored Cop Cars, which will activate their sirens and hound the player when provoked. They can be attacked and destroyed, but do not count as opponents. A single "Super Squad Car" exists in one level, and it can be claimed if destroyed.

An Action Replay with multiple camera viewpoints is available at any point during a race.

## HISTORY

Blast from the past

Carmageddon is the first of a series of graphically violent driving-oriented video games. It was conceived and developed by Stainless Games, published by SCi and released June 30, 1997 on PC & Mac. It was, and remains, a poster child for video game controversy. The controversy surrounded the game's central premise; that of earning reward for running down innocent pedestrians. The game was notable for its realistic and ground-breaking physics, and for its in-game action replay features. It was also one of the earliest examples of a sandbox 3D driving game, and may have influenced other later games including the Driver and Grand Theft Auto series.

### ABOUT STAINLESS GAMES

Stainless was founded in 1994 by Patrick Buckland, a veteran of the games industry going back to the Jurassic period of 1982, and Neil Barnden, who used to have hair like a mammoth. A team of 8 worked on the original Carmageddon at Stainless, and 5 are still with the company today, although a couple of them are now kept manacled in a small padded room in the cellar.

Stainless Games now employs around one hundred mad, dedicated people of assorted gender, height and width. They can all be found dangling precariously from a small chalky rock just off the South Coast of England.

Wonderful game, good way to blow some steam when you are angry. lots of fun.

first time i played it was on a pc with a pentium 1 processor and 8mb of ram.. Even after 19 years its initial release, it still entertains me.. Okay. First of all, DON'T buy unless you're willing to do some patching up to get this game running smooth on modern systems. It will highly, highly unlikely not run smoothly right outta the box.

Then, the review. Good stuff:

- The gameplay. Has aged without any decay. Complete the race by wrecking all other competitors, running over all pedestrians in the level (not easy..) or drive through all the laps (there's no positions, only the checkpoints need be passed, all laps completed).

There's complete freedom to do as you please, this really is a standout feature. The derby action is good fun. Crashes are properly satisfying. Running over pedestrians hardly gets unfun either, what with the great sounds and over-the-top gore.

- Large maps with much to explore and find, for the game's age. And if you are to complete a race by killing all the peds, you're gonna have to somehow get your way to building roofs and other not-easy-to-reach places. The maps have a wide variety of themes too. For example, a city, mine shafts, tropical island, Mayan ruins, coastal area..

Atmosphere. First, the character roster, where nobody is normal nor sane. And everyone has fittingly cool and crazy cars too, first of course, Max Damage's Eagle, then for example there's a monster truck with drill in front, Delorean with some painful-looking blades in it's front, etc.. Visuals are nice when it comes to art style. The graphics haven't aged very gracefully but the art style is nice, there's a suitable amount of grit.

What sucks:

This release. Doesn't run smoothly right outta the box. First you gotta install 95RPP, then see if it'll make the game work nice. If it doesn't try replacing the DirectDraw wrapper that comes with it by removing from game's folder the ddraw.dll and replacing it with DGVoodoo's.. You know you want this, it's one of the greatest game of the 90's, for a game of that time, it sure is beautiful, Hell, it's better looking than most of nowadays video games, no blur, no depth of field, no other bullcrap that "hides" the ugliness of nowadays games.

Pretty great game overall, still worth playing despite the release of Max Damage, first-person driving is better and better looking

---

than in the new one to be honest, driving is overall better but only by a bit (in my opinion), music is great, what pains me in the new one is that you can't see your dude and his facial expressions, that is such a good addition in my opinion.

Anyway, I suggest it to anyone who likes carnage, adrenaline, Destruction Derby (game), Death Rally (game), Twisted Metal, Mad Max, Interstate 76 (game), Motor Mayhem (game) and perhaps FlatOut. They kind of share some similiarities between each of them.

If you like adrenaline games such as Unreal Tournament, Quake or Duke Nukem, you may like this if it doesn't bother you to play using cars, and well, perhaps Postal 2? Same kind of mayhem but with cars instead, difference is, this game is pure quality.

Fu\*\* yeah!V10 (9.5V.10). Ah, Carmageddon, a game where you don't just race other opponents, but also try to destroy them, and run over hundreds of innocent pedestrians in the process. Wicked fun. And you are rewarded for all of this, which makes it even more fun. The game even lets you know how many pedestrians there are on each level, so you can make sure every single one is mangled.

There are some old games that I think have really good looking graphics, even though they aren't very realistic like modern games. Carmageddon is one of them. There's a grittiness and personallity to the graphics that new games don't have. The lower detail of the graphics also gives the game a little more challenge, as it can be hard to see things coming up at times (at least before you get used to the graphics).

The game can be annoying at times though. I found the vehicle handling\controls hard to get used to as first. At least with one car, you can easily get stuck to walls, and have to steer into the wall to get free. That doesn't really stop being annoying. Also if you go too fast up a steep hill, you can end up launching off and flying way too far, and will end up needing to be recovered. These minor things don't detract from the fun though.

The game has some good music that goes good with the game. There some rock songs and some electronic songs. But if you don't like them or get tired of them, you can always turn on some Metal. Metal goes great with this game.

Carmageddon is a lot of fun. If you like games like Postal or GTA. If you like running over people, wrecking cars, and causing chaos, then you will like this game. If you haven't already played it and don't own it, then you should get it now. Or when it's on sale.

9.5V10. Wow, really cool. Funny, badass and dynamic. Controls are awesome, optimization is awesome, soundtrack is hard and nice. Must have.. A classic but buggy

---

Is this game good?! Yes. Why? Because it's Carma F Geddon that's why and it's a classic.. One of the best games i ever played. Just pure fun, brings back a lot childhood memorys. Original & Still one of the best.. Quite simply the greatest racing game of all time. Think Death Race 2000 (the original, not the crappy remake) on the PC.

I have wasted literally days of my life playing Carmageddon over the last 20 years. I have ZERO regrets.. Once i got the hang of it, this is one of the best gaming experiences ive had in a loooong time. Been up all night playing it. What a great way to spend halloween.....
